Resumo

Full Stack Developer, I worked remotely in the USA as a volunteer front-end developer, and I'm trained by Labenu's bootcamp, where I built practical projects focusing on technologies such as React, JavaScript, HTML, CSS, and others.

Additionally, I have a Bachelor's degree in Architecture and Urbanism, and I have worked in the construction industry managing teams, collaborating on group projects, resolving conflicts, and optimizing processes. I had some experiences with BIM softwares to automate architectural projects, and through this experience I found the motivation to make a career transition.

Skills

HTML, CSS, JavaScript, React.JS, Styled Components, React Hooks, Git, GitHub, Next.JS, Python, Node Js, Typescript, SQL, MySQL, Unity testing, REST, Api Restful, HTTP, Jest, Knex, AWS, Firebase

Education

LABENU (03/2023 – 08/2023) – Web Full-Stack development Bootcamp

A program with over 1000 hours of practical experience, guided by agile methodologies (Kanban/Scrum). Among the skills learned during the course are: HTML, CSS, JavaScript, React.JS, Styled-Components, React Hooks, REST, Api Restful, HTTP, Jest, Node.JS, Knex, TypeScript, MySQL, AWS, SQL, Git, GitHub, Firebase, Unit Testing, and UI Design.

UFBA – Federal University of Bahia (06/2016 – 12/2022) – Bachelor of Architecture and Urbanism

Projects

Social Network – 08/2023

A full-Stack application with a mobile-first frontend for a small social network platform, and a backend that builds an API with database to create users, posts, comments and likes.
